

## MPG+ FUEL CATALYST

MPG+ is a unique fuel catalyst, which breaks down the larger, hard to burn, molecules in all carbon based fuels, such as Petrol, Diesel, Biodiesel and fuel oil. This results in your low grade fuel having the performance of a race fuel, increasing power or economy, cleansing the fuel system, whilst reducing emissions all through a non-hazardous, non-flammable catalyst, which contains no solid particles.

- Increase Fuel Economy by on average 10%
- Treats Petrol and Diesel
- Bottle Treats 5 Tanks of fuel  
(a total of 300 litres, 15 litres per 5 ml Dispenser)
- Increase Power
- Reduce Emissions
- Cleans your system
- Reduces Carbon Deposits
